

The pull-down capacitor is optional here

Differential amplifier (subtractor) circuit

The pull-down capacitor is optional here

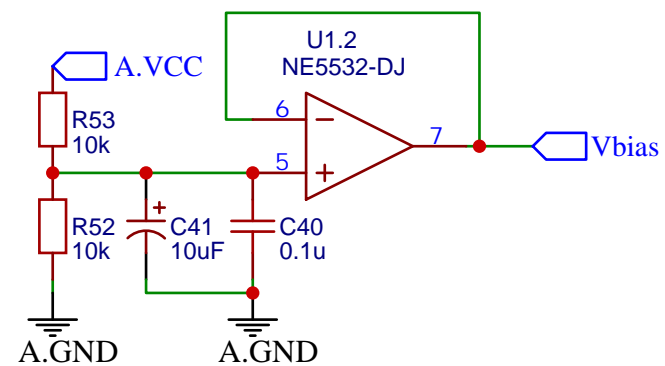

Differential amplification can suppress the bus noise generated by OPLL to the greatest extent

Pull-down resistor switching: 1/4 original, 3/6 clone

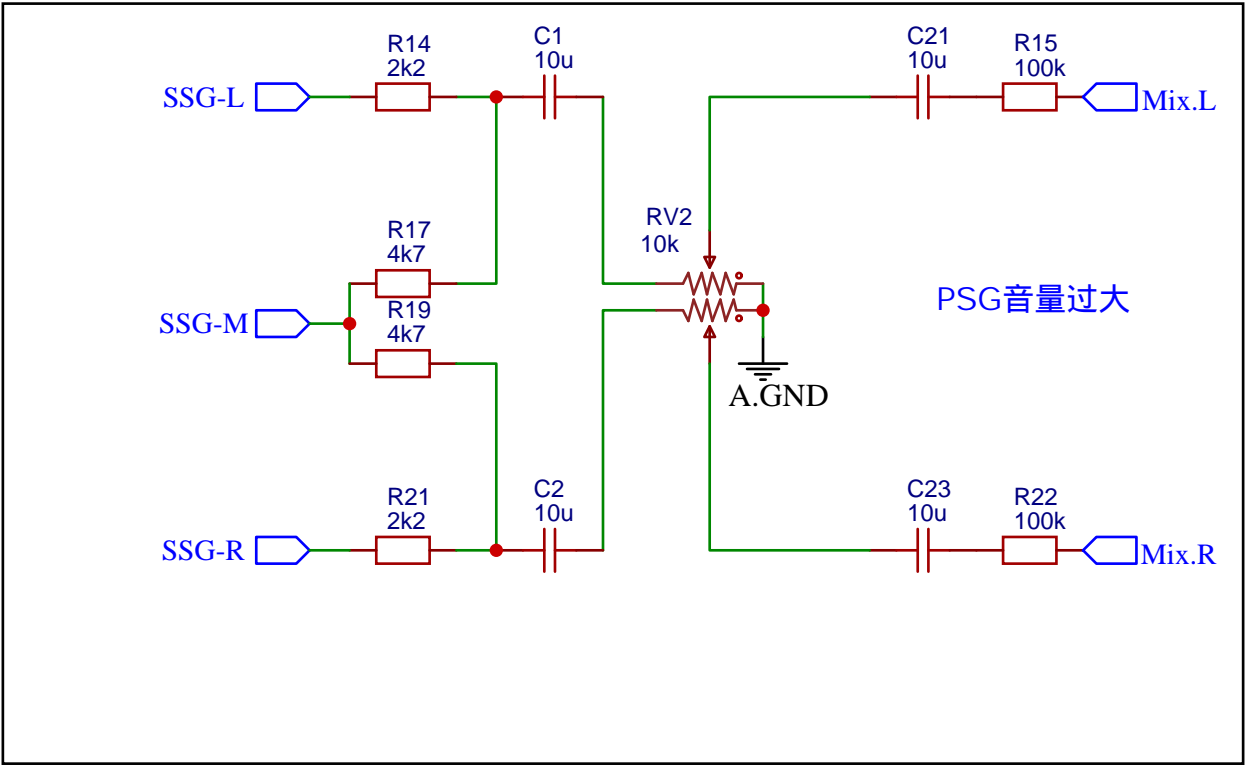

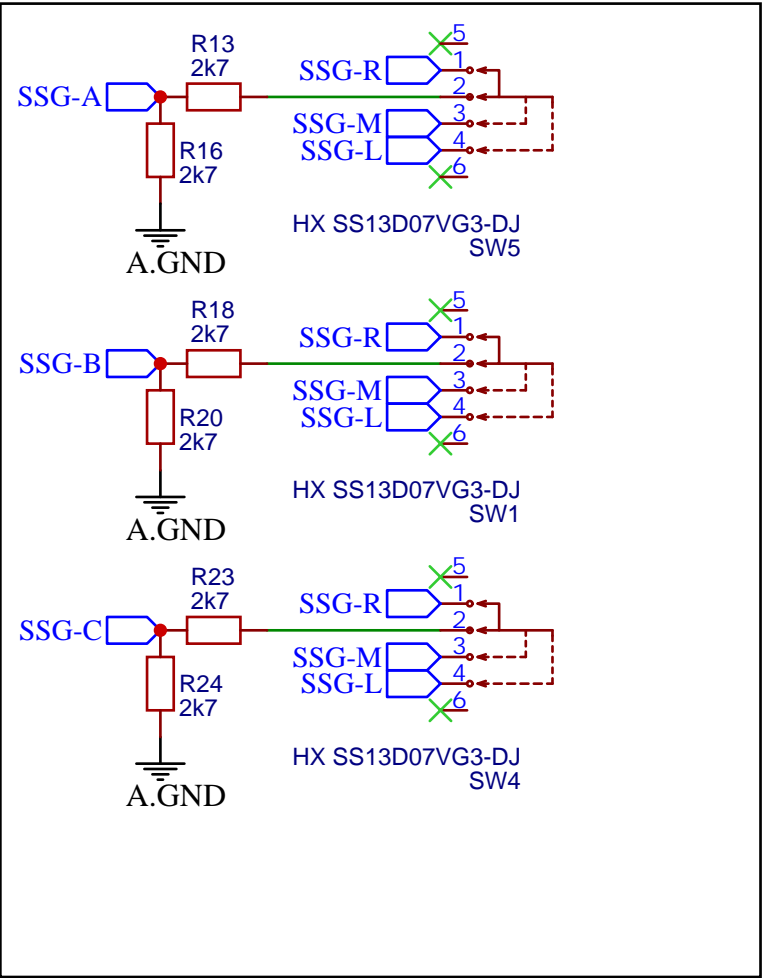

Volume attenuation resistor switching: 1/4 original, 3/6 clone

YM2413 original/clone chip mixing circuit switching

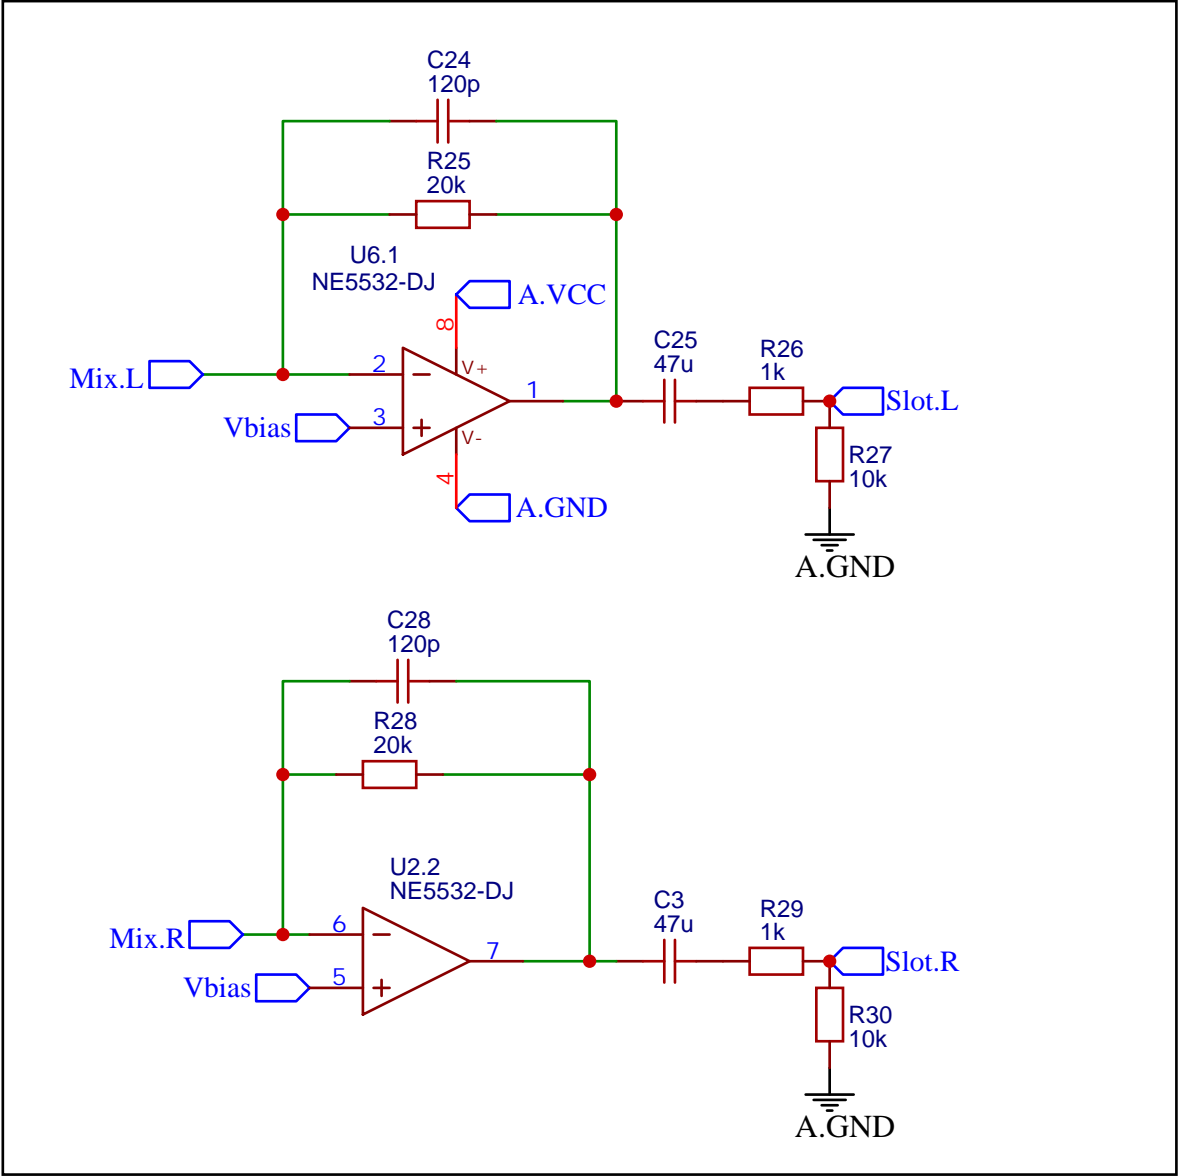

TITLE: Sheet_1		REV: 1.0
嘉立创EDA	Company: Your Company	Sheet: 1/1
